DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims **1-26**, drawn to a home network, classified in class 725, subclass 78.
 - II. Claims **27-47**, drawn to a demarcation point unit, classified in class 725, subclass 127.
 - III. Claims **48-49**, drawn to a network module, classified in class 725, subclass 119.
 - IV. Claims **50-65**, drawn to a communication method, classified in class 725, subclass 147.
 - V. Claims **66-67**, drawn to a bridge, classified in class 725, subclass 119.
 - VI. Claims **68-70**, drawn to a burst, classified in class 725, subclass 119.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II-VI are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the home network of invention I does not require the details of inventions II-VI. The subcombination II has separate utility such as if the demarcation point unit were used in a home network that excluded network modules connected between a network backbone and a

local bus. The subcombinations III, IV, V, and VI have separate utility such as if the network module/communication method/bridge/burst were used in a home network that excluded the use of a demarcation point unit as defined in invention I.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. A telephone call was made to the applicant's attorney to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
